

Chichester Priory 10K

Last year we had some issues with the chip timing solution provided at the start, so for 2008 I needed to get it right, with no scope for any error. The electronic wire on the back of the number was inappropriate for a start on a dual carriageway. We needed something that could be installed on the highway in about ten minutes - there was a new device on the market which would meet our requirements but it was untested and untried for real in the UK although I knew a number of suppliers had it in their test lab.

The HS Sports staff were very informative with their knowledge and explanations even inviting me to their second live race using their new system. Nothing was too much trouble in time, demonstrations and they let me walk round every operational activity - the start, the system operation, results and the 'de-tagging' area. It worked well at that point I was convinced and we signed up! The professionalism and attention to detail at every level particularly impressed me.

At the Chichester 10k race the service received was second to none, absolute first class, and from my point of view it went like a dream. All of the race entry adjustments were included, the start timing point took only eight minutes to set up and test (Ideal for our tight schedule, due to road closures), the finish was extremely orderly and the results extremely accurate and well presented, were available almost immediately.

Following the race we had no queries after 48 hours, a record in 18 years and an impressive achievement with 1500 entrants.

I would have no hesitation in using HS Sports again and would recommend their technical know-how, customer service and professionalism to any race organiser.

Race Director – Chichester 10k

“At the Chichester 10k race the service received was second to none, absolute first class, and from my point of view it went like a dream”

“We enjoyed tremendous support prior to, during and post event from the HS Sports team”

“The HS Sports staff were very informative with their knowledge and explanations”

“I would have no hesitation in using HS Sports again and would recommend their technical know-how, customer service and professionalism to any race organiser”
