

Llanelli Waterside

As organizers of prestigious high quality athletic events we have to consider every aspect of our events infrastructure. Race timing is one of the most important elements in any high quality event. Every participant that crosses the finish line wants to know to the second their time for the distance covered. It is as important for the winners as it is for the fun runners towards the back of the field.

HS Sports provide a timing service that is second to none. At the Llanelli Waterside Half Marathon this year they ensured that every stage of their involvement with the event was meticulously planned and actioned. Their presence at the event, added enormously to the professional image needed to help ensure, that the participants would continue to rate the Llanelli Waterside Half Marathon as one of the top 10 UK races over the distance.

The UK market leaders for sports timing are HS Sports and we highly recommend them for the trouble free professional service they provide.
